FOREWORD

This bibliography is one of a series which aims to cover a large part of aeronautical literature. It is published by the U. S. Works Progress Administration Project 465-97-3-21 (formerly 165-97-6055) under the sponsorship of the New York City Department of Docks with the cooperation of the Institute of the Aeronautical Sciences.

Request for Additions

The Institute of the Aeronautical Sciences which is directing the U. S. Works Progress Administration staff of workers will appreciate receiving additional references, corrections and criticism, so that the bibliographies will be more helpful when issued in final form.

Request for Copies

The bibliographies have been prepared with funds allotted by the U. S. Works Progress Administration. They may not be sold.

Persons and organizations wishing to procure copies may apply for them by letter, stating the use for which they are needed. When it is possible to prepare additional copies such requests will receive first consideration.

Address all correspondence to:
